**Arduino Projects to Save the World** Emery Premeaux, Brian Evans

*Arduino Projects to Save the World* shows that it takes little more than a few tools, a few wires and sensors, an Arduino board, and a bit of gumption to build devices that lower energy bills, help you grow our own food, monitor pollution in the air and in the ground, even warn you about earth tremors.

*Arduino Projects to Save the World* introduces the types of sensors needed to collect environmental data?from temperature sensors to motion sensors. You'll see projects that deal with energy sources?from building your own power strip to running your Arduino board on solar panels so you can actually proceed to build systems that help, for example, to lower your energy bills. Once you have some data, it's time to put it to good use by publishing it online as you collect it; this book shows you how.

The core of this book deals with the Arduino projects themselves:

- Account for heat loss using a heat loss temperature sensor array that sends probes into every corner of your house for maximum measurement.
- Monitor local seismic activity with your own seismic monitor.
- Keep your Arduino devices alive in the field with a solar powered device that uses a smart, power-saving design.
- Monitor your data and devices with a wireless radio device; place your sensors where you like without worrying about wires.
- Keep an eye on your power consumption with a sophisticated power monitor that records its data wherever you like.

*Arduino Projects to Save the World* teaches the aspiring green systems expert to build environmentally-sound, home-based Arduino devices. Saving the world, one Arduino at a time.

**Please note:** the print version of this title is black & white; the eBook is full color.

### From reader reviews:

#### Verline Custer:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a e-book. Book has a different type. As we know that book is important thing to bring us around the world. Beside that you can your reading expertise was fluently. A reserve Arduino Projects to Save the World will make you to always be smarter. You can feel far more confidence if you can know about almost everything. But some of you think this open or reading a new book make you bored. It's not make you fun. Why they could be thought like that? Have you looking for best book or suited book with you?

#### Christopher Rayes:

Information is provisions for anyone to get better life, information these days can get by anyone from everywhere. The information can be a information or any news even a concern. What people must be consider any time those information which is in the former life are challenging to be find than now's taking seriously which one is appropriate to believe or which one the particular resource are convinced. If you receive the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Arduino Projects to Save the World as your daily resource information.

#### Cornell Smith:

People live in this new day of lifestyle always try and and must have the free time or they will get great deal of stress from both day to day life and work. So , whenever we ask do people have free time, we will say absolutely of course. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, the actual book you have read is actually Arduino Projects to Save the World.

#### Janice Martin:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Arduino Projects to Save the World can make you truly feel more interested to read.
