Data Architect: Adapting to Agile Data Modeling in a Big Data World

Steve Hoberman

Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World Steve Hoberman

Build a working knowledge of data modeling concepts and best practices, along with how to apply these principles with ER/Studio. This second edition includes numerous updates and new sections including an overview of ER/Studio's support for agile development, as well as a description of some of ER/Studio's newer features for NoSQL, such as MongoDB's containment structure. You will build many ER/Studio data models along the way, applying best practices to master these ten objectives:

1. Know why a data model is needed and which ER/Studio models are the most appropriate for each situation
2. Understand each component on the data model and how to represent and create them in ER/Studio
3. Know how to leverage ER/Studio's latest features including those assisting agile teams and forward and reverse engineering of NoSQL databases
4. Know how to apply all the foundational features of ER/Studio
5. Be able to build relational and dimensional conceptual, logical, and physical data models in ER/Studio
6. Be able to apply techniques such as indexing, transforms, and forward engineering to turn a logical data model into an efficient physical design
7. Improve data model quality and impact analysis results by leveraging ER/Studio's lineage functionality and compare/merge utility
8. Be able to apply ER/Studio's data dictionary features
9. Learn ways of sharing the data model through reporting and through exporting the model in a variety of formats
10. Leverage ER/Studio's naming functionality to improve naming consistency, including the new Automatic Naming Translation feature.

This book contains four sections:

Section I introduces data modeling and the ER/Studio landscape. Learn why data modeling is so critical to software development and even more importantly, why data modeling is so critical to understanding the business. You will learn about the newest features in ER/Studio (including features on big data and agile), and the ER/Studio environment. By the end of this section, you will have created and saved your first data model in ER/Studio and be ready to start modeling in Section II!

Section II explains all of the symbols and text on a data model, including entities, attributes, relationships, domains, and keys. By the time you finish this section, you will be able to 'read' a data model of any size or complexity, and create a complete data model in ER/Studio.

Section III explores the three different levels of models: conceptual, logical, and physical. A conceptual data model (CDM) represents a business need within a defined scope. The logical data model (LDM) represents a detailed business solution, capturing the business requirements without complicating the model with implementation concerns such as software and hardware. The physical data model (PDM) represents a detailed technical solution. The PDM is the logical data model compromised often to improve performance

or usability. The PDM makes up for deficiencies in our technology. By the end of this section you will be able to create conceptual, logical, and physical data models in ER/Studio.

Section IV discusses additional features of ER/Studio. These features include data dictionary, data lineage, automating tasks, repository and portal, exporting and reporting, naming standards, and compare and merge functionality.

From reader reviews:

Robert Qualls:

Book is written, printed, or highlighted for everything. You can know everything you want by a publication. Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading skill was fluently. A reserve Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World will make you to become smarter. You can feel much more confidence if you can know about everything. But some of you think that open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you in search of best book or appropriate book with you?

Oscar Jackson:

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a book will give you a lot of new info. When you read a book you will get new information since book is one of various ways to share the information as well as their idea. Second, looking at a book will make you more imaginative. When you examining a book especially tale fantasy book the author will bring you to definitely imagine the story how the characters do it anything. Third, you may share your knowledge to some others. When you read this Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World, you could tells your family, friends and soon about yours book. Your knowledge can inspire the others, make them reading a guide.

Ann McLemore:

The book untitled Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World is the e-book that recommended to you to see. You can see the quality of the publication content that will be shown to a person. The language that author use to explained their ideas are easily to understand. The article author was did a lot of study when write the book, hence the information that they share to you is absolutely accurate. You also could possibly get the e-book of Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World from the publisher to make you considerably more enjoy free time.

Donald Shelton:

Are you kind of occupied person, only have 10 or even 15 minute in your morning to upgrading your mind expertise or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your small amount of time to read it because all of this time you only find book that need more time to be examine. Data Modeling Made Simple with Embarcadero ER/Studio Data Architect: Adapting to Agile Data Modeling in a Big Data World can be your answer as it can be read by you who have those short free time problems.
