In the Information Society, the smart card, or smart device with its processing power and link to its owner, will be the potential human representation or delegate in Ambient Intelligence (Pervasive Computing), where every appliance or computer will be connected, and where control and trust of the personal environment will be the next decade challenge.

Smart card research is of increasing importance as the need for information security grows rapidly. Smart cards will play a very large role in ID management in secure systems. In many computer science areas, smart cards introduce new dimensions and opportunities. Disciplines like hardware design, operating systems, modeling systems, cryptography and distributed systems find new areas of applications or issues; smart cards also create new challenges for these domains.

CARDIS, the IFIP Conference on Smart Card Research and Advanced Applications, gathers researchers and technologists who are focused in all aspects of the design, development, deployment, validation and application of smart cards or smart personal devices.This volume contains the 20 papers that have been selected by the CARDIS Program Committee for presentation at the 6th International Conference on Smart Card Research and Advanced Applications (CARDIS 2004), which was held in conjunction with the IFIP 18th World Computer Congress in Toulouse, France in August 2004 and sponsored by the International Federation for Information Processing (IFIP). With 20% of the papers coming from Asia, 20% from America, and 60% from Europe, the competition was particularly severe this year, with only 20 papers selected out of 45 very good submissions.

Smart Card Research and Advanced Applications VI presents the latest advances in smart card research and applications, and will be essential reading for developers of smart cards and smart card applications, as well as for computer science researchers in computer architecture, computer security, and cryptography.

From reader reviews:

Jerry Gavin:

This Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this book incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This specific Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) without we understand teach the one who looking at it become critical in considering and analyzing. Don't possibly be worry Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) can bring any time you are and not make your carrier space or bookshelves' become full because you can have it with your lovely laptop even telephone. This Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) having excellent arrangement in word and also layout, so you will not really feel uninterested in reading.

Matthew Schwartz:

In this age globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The actual book that recommended for you is Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) this book consist a lot of the information of the condition of this world now. That book was represented so why is the world has grown up. The terminology styles that writer require to explain it is easy to understand. Often the writer made some analysis when he makes this book. Here is why this book appropriate all of you.

Carol Smith:

Is it you who having spare time in that case spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) can be the reply, oh how comes? A book you know. You are so out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these guides have than the others?

Rick Fountain:

As we know that book is significant thing to add our information for everything. By a book we can know everything you want. A book is a range of written, printed, illustrated or even blank sheet. Every year has been exactly added. This publication Smart Card Research and Advanced Applications VI: IFIP 18th World Computer Congress TC8/WG8.8 & TC11/WG11.2 Sixth International Conference on Smart ... in Information and Communication Technology) was filled with regards to science. Spend your time to add your knowledge about your technology competence. Some people has several feel when they reading a book. If you know how big benefit from a book, you can feel enjoy to read a book. In the modern era like today, many ways to get book that you just wanted.
