Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity

Wade Cook, Joe Zhu

Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity Wade Cook, Joe Zhu

The current book introduces the methodology of data envelopment analysis (DEA). DEA uses mathematical programming techniques and models to evaluate the performance of peer units (e.g., bank branches, hospitals and schools) in terms of multiple inputs used and multiple outputs produced. DEA examines the resources available to each unit and monitors the "conversion" of these resources (inputs) into the desired outputs. The book gives an overview of the various models from the literature, and the geometric interpretations provided permit the reader to go beyond the mathematics. Various topics are covered relating to important practical considerations. These include dealing with time series data as well as methods for restricting multipliers. The book will thus provide students, researchers and practitioners with a solid understanding of the methodology, its uses and its potential.

From reader reviews:

Susan Williams:

People live in this new time of lifestyle always try to and must have the free time or they will get lot of stress from both way of life and work. So , whenever we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we question again, what kind of activity do you have when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading books. It can be your alternative with spending your spare time, the actual book you have read is usually Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity.

Ken Martin:

The book untitled Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity contain a lot of information on it. The writer explains the girl idea with easy method. The language is very straightforward all the people, so do certainly not worry, you can easy to read the item. The book was compiled by famous author. The author will bring you in the new period of literary works. You can easily read this book because you can read more your smart phone, or product, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site along with order it. Have a nice read.

Margaretta Lee:

In this period of time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The book that recommended to you is Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity this e-book consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The words styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. That is why this book suited all of you.

Aurora Foster:

You may get this Data Envelopment Analysis: Modeling Operational Processes And Measuring Productivity by go to the bookstore or Mall. Just viewing or reviewing it may to be your solve problem if you get difficulties on your knowledge. Kinds of this e-book are various. Not only by simply written or printed but in addition can you enjoy this book by means of e-book. In the modern era like now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose appropriate ways for you.
