Have you ever wished you could bend a piece of tubing to make that perfect curve for one of your jewellery designs - but didn't know how? Or know the principle, but were too scared to try in case you ruined your precious metal? In this booklet, I show you how to bend small-bore silver tubing for jewellery making with step-by-step instructions and full colour illustrations. The technique can also be used by model-makers (for example, model railway enthusiasts). Also includes photos of jewellery made using the technique described, a section of useful Hints & Tips, and a free steam train. (Okay, I made that bit up. No, really - no steam train.)
