Combinatorial Game Theory (Graduate Studies in Mathematics)

Aaron N. Siegel

Combinatorial Game Theory (Graduate Studies in Mathematics) Aaron N. Siegel

Combinatorial game theory is the study of two-player games with no hidden information and no chance elements. The theory assigns algebraic values to positions in such games and seeks to quantify the algebraic and combinatorial structure of their interactions. Its modern form was introduced thirty years ago, with the publication of the classic *Winning Ways for Your Mathematical Plays* by Berlekamp, Conway, and Guy, and interest has rapidly increased in recent decades. This book is a comprehensive and up-to-date introduction to the subject, tracing its development from first principles and examples through many of its most recent advances. Roughly half the book is devoted to a rigorous treatment of the classical theory; the remaining material is an in-depth presentation of topics that appear for the first time in textbook form, including the theory of misère quotients and Berlekamp's generalized temperature theory. Packed with hundreds of examples and exercises and meticulously cross-referenced, *Combinatorial Game Theory* will appeal equally to students, instructors, and research professionals. More than forty open problems and conjectures are mentioned in the text, highlighting the many mysteries that still remain in this young and exciting field. Aaron Siegel holds a Ph.D. in mathematics from the University of California, Berkeley and has held positions at the Mathematical Sciences Research Institute and the Institute for Advanced Study. He was a partner at Berkeley Quantitative, a technology-driven hedge fund, and is presently employed by Twitter, Inc.

From reader reviews:

James Donovan:

Hey guys, do you would like to finds a new book to see? May be the book with the title Combinatorial Game Theory (Graduate Studies in Mathematics) suitable to you? Often the book was written by well known writer in this era. The book untitled Combinatorial Game Theory (Graduate Studies in Mathematics)is the one of several books which everyone read now. This particular book was inspired a lot of people in the world. When you read this book you will enter the new shape that you ever know prior to. The author explained their strategy in the simple way, consequently all of people can easily to understand the core of this reserve. This book will give you a wide range of information about this world now. So that you can see the represented of the world in this particular book.

Diane Russel:

You may spend your free time to study this book this e-book. This Combinatorial Game Theory (Graduate Studies in Mathematics) is simple to create you can read it in the park, in the beach, train as well as soon. If you did not have much space to bring the particular printed book, you can buy the e-book. It is make you easier to read it. You can save the actual book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Maritza Berry:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Combinatorial Game Theory (Graduate Studies in Mathematics) can make you sense more interested to read.

Harry Duffey:

A lot of people said that they feel uninterested when they reading a e-book. They are directly felt the item when they get a half areas of the book. You can choose typically the book Combinatorial Game Theory (Graduate Studies in Mathematics) to make your personal reading is interesting. Your own skill of reading proficiency is developing when you including reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and reading through especially. It is to be initially opinion for you to like to wide open a book and go through it. Beside that the book Combinatorial Game Theory (Graduate Studies in Mathematics) can be your brand new friend when you're truly feel alone and confuse with what must you're doing of the time.
