## Technology of Reduced-Additive Foods

The food industry for many years reacted to consumer demand for more appealing and convenient food products by using additives. More recently the demands of consumers have grown to include still higher performance products but with less additives. The industry has responded accordingly. There are often significant scientific and technical obstacles to be overcome to make a product with less additives. It is these technical challenges that this book is intended to address. The approach taken in this book is to examine specific aspects of the industry where important contributions are being made to avoid or reduce additive use or to create new, natural and more acceptable additives which can replace the old ones. There is a tremendous amount of work underway in this field and to cover it comprehensively would fill many volumes. This volume addresses the areas where there has been a considerable amount of recent activity and published results. Chapter 1 covers starter cultures in dairy products, meat products and bread. The author is Professor Gunnar Mogensen, the Director of Research and Development for Chr. Hansen's Laboratorium, the foremost suppliers of starter cultures in the world. He examines developments in starter culture technology and illustrates ways in which starter cultures are replacing traditional additives in foods.

### From reader reviews:

#### **Rafael Arent:**

Information is provisions for anyone to get better life, information today can get by anyone with everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is inside former life are hard to be find than now could be taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you buy it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Technology of Reduced-Additive Foods as your daily resource information.

#### **Elliot Weber:**

Many people spending their moment by playing outside along with friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by reading a book. Ugh, ya think reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Smartphone. Like Technology of Reduced-Additive Foods which is having the e-book version. So , why not try out this book? Let's notice.

#### **Wesley Mansour:**

Is it you who having spare time subsequently spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Technology of Reduced-Additive Foods can be the respond to, oh how comes? A book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a geek activity. So what these publications have than the others?

#### **Jamie Harper:**

As a student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some publication, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Technology of Reduced-Additive Foods can make you really feel more interested to read.
