Microsoft Dynamics AX 2012 R2 Services Klaas Deforche, Kenny Saelen
Harness the power of Microsoft Dynamics AX 2012 R2 to create and use your own services effectively

About This Book

- Learn about the Dynamics AX 2012 service architecture
- Create your own services using wizards or X++ code
- Deploy your services in a variety of ways using High Availability

Who This Book Is For

If you are a Dynamics AX developer, new or experienced who wants to implement services with Microsoft Dynamics AX 2012, then this book is for you. A basic understanding of MorphX and X++ is assumed, but the step-by-step instructions are easy to follow even for beginners. Some examples use C# and .NET, so experience with Visual Studio is a plus but not a must.

What You Will Learn

- Use the AIF Document Service Wizard
- Create custom services in X++
- Configure enhanced integration ports
- Deploy services using a variety of protocols
- Consume your services in .NET
- Consume external web services in X++
- Use the SysOperation framework to create batch processes
- Set up tracing and debugging

In Detail

Enterprise Resource Planning (ERP) systems such as Microsoft Dynamics AX 2012 play a central role in an organization, and therefore, there will always be the need to integrate them with other applications. In many cases, services are the preferred way to do this, and Microsoft Dynamics AX 2012 is now more flexible than ever when it comes to the creation and use of these services. Understanding these services will help you effectively identify where they can be used.

Microsoft Dynamics AX 2012 R2 Services is a hands-on guide that provides you with all the knowledge you will need to implement services with Microsoft Dynamics AX 2012 R2. The step-by-step examples will walk you through many of the tasks that you need to perform frequently when creating and using services. This book has been updated to include features of the R2 release while staying relevant to previous version of Microsoft Dynamics AX 2012.

This book will help you to identify situations where services can be used for your implementations. By providing step-by-step instructions for many of the common tasks you will face, you will gain practical

know-how on to get the job done.

Easy-to-follow instructions are provided for all the types of services you will encounter. You will learn how to create document services using the AIF Document Service Wizard, and how to use X++ to create custom services. You will also learn how to deploy services and web services and how you can consume them in both X++ and .NET. These services are also put to use in the SysOperation framework, which uses services to run business logic and is the new way to create batch processes in Microsoft Dynamics AX 2012.

Microsoft Dynamics AX 2012 R2 Services provides detailed and practical examples for creating and using services that will make it an invaluable resource that you will consult frequently during your implementations.
