The Art of Network Architecture: Business-Driven Design (Networking Technology) Russ White, Denise Donohue
The Art of Network Architecture
Business-Driven Design

The business-centered, business-driven guide to architecting and evolving networks

The Art of Network Architecture is the first book that places business needs and capabilities at the center of the process of architecting and evolving networks. Two leading enterprise network architects help you craft solutions that are fully aligned with business strategy, smoothly accommodate change, and maximize future flexibility.

Russ White and Denise Donohue guide network designers in asking and answering the crucial questions that lead to elegant, high-value solutions. Carefully blending business and technical concerns, they show how to optimize all network interactions involving flow, time, and people.

The authors review important links between business requirements and network design, helping you capture the information you need to design effectively. They introduce today's most useful models and frameworks, fully addressing modularity, resilience, security, and management. Next, they drill down into network structure and topology, covering virtualization, overlays, modern routing choices, and highly complex network environments.

In the final section, the authors integrate all these ideas to consider four realistic design challenges: user mobility, cloud services, Software Defined Networking (SDN), and today's radically new data center environments.

- Understand how your choices of technologies and design paradigms will impact your business
- Customize designs to improve workflows, support BYOD, and ensure business continuity
- Use modularity, simplicity, and network management to prepare for rapid change
- Build resilience by addressing human factors and redundancy
- Design for security, hardening networks without making them brittle
- Minimize network management pain, and maximize gain
- Compare topologies and their tradeoffs
- Consider the implications of network virtualization, and walk through an MPLS-based L3VPN example
- Choose routing protocols in the context of business and IT requirements
- Maximize mobility via ILNP, LISP, Mobile IP, host routing, MANET, and/or DDNS
- Learn about the challenges of removing and changing services hosted in cloud environments
- Understand the opportunities and risks presented by SDNs
- Effectively design data center control planes and topologies

From reader reviews:

David Butler:

The book *The Art of Network Architecture: Business-Driven Design (Networking Technology)* give you a sense of feeling enjoy for your spare time. You need to use to make your capable considerably more increase. Book can to be your best friend when you getting tension or having big problem using your subject. If you can make examining a book *The Art of Network Architecture: Business-Driven Design (Networking Technology)* for being your habit, you can get much more advantages, like add your own capable, increase your knowledge about several or all subjects. You could know everything if you like wide open and read a publication *The Art of Network Architecture: Business-Driven Design (Networking Technology)*. Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this guide?

Mike Yerkes:

Hey guys, do you wishes to finds a new book to study? May be the book with the headline *The Art of Network Architecture: Business-Driven Design (Networking Technology)* suitable to you? Often the book was written by well known writer in this era. The actual book untitled *The Art of Network Architecture: Business-Driven Design (Networking Technology)* is the main one of several books this everyone read now. This particular book was inspired lots of people in the world. When you read this book you will enter the new dimensions that you ever know ahead of. The author explained their concept in the simple way, consequently all of people can easily to know the core of this publication. This book will give you a great deal of information about this world now. In order to see the represented of the world in this book.

Gloria Brower:

Exactly why? Because this *The Art of Network Architecture: Business-Driven Design (Networking Technology)* is an unordinary book that the inside of the publication waiting for you to snap it but latter it will distress you with the secret it inside. Reading this book adjacent to it was fantastic author who also write the book in such remarkable way makes the content inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of gains than the other book have got such as help improving your skill and your critical thinking approach. So , still want to postpone having that book? If I ended up you I will go to the book store hurriedly.

Leah Pelton:

It is possible to spend your free time you just read this book this e-book. This *The Art of Network Architecture: Business-Driven Design (Networking Technology)* is simple to deliver you can read it in the area, in the beach, train along with soon. If you did not have got much space to bring the particular printed book, you can buy often the e-book. It is make you quicker to read it. You can save the book in your smart

phone. Therefore there are a lot of benefits that you will get when one buys this book.
