## **Science, Society and Power: Environmental Knowledge and Policy in West Africa and the Caribbean**

James Fairhead, Melissa Leach

This book brings science to the heart of debates about globalization by exploring the globalization of science and its contrasting effects in Guinea (one of the world's poorest countries) and Trinidad (a more prosperous, industrialized and urbanized island). It focuses on environment, forestry and conservation, sciences that are central to these countries and involve resources that many depend upon for their livelihoods. Taking a unique ethnographic approach drawn from anthropology, development and science studies, the work will appeal to students and researchers across the social sciences, as well as policy-makers and practitioners.
