Metarepresentations: A Multidisciplinary Perspective (Vancouver Studies in Cognitive Science)

Metarepresentations: A Multidisciplinary Perspective (Vancouver Studies in Cognitive Science)

This volume in the Vancouver Studies in Cognitive Science series concerns metarepresentation: the construction and use of representations that represent other representations. Metarepresentations are ubiquitous among human beings, whenever we think or talk about mental states or linguistic acts, or theorize about the mind or language. This volume collects previously unpublished studies on the subject by an interdisciplinary group of contributors, including Daniel Dennett, Alvin Goldman, Keith Lehrer, Leda Cosmides and John Tooby.
